ALBERT HWA, PH.D. **JDRF FEATURED SPEAKER**
SENIOR PROGRAM SCIENTIST, BETA CELL THERAPIES

Albert Hwa, Ph.D., joined JDRF's Research Team in 2007 as the scientific program manager in the beta cell therapies program. In this role, he develops and manages research initiatives related to islet transplantation, bioengineering, stem cell research, cell encapsulation, and cellular reprogramming. He has served as JDRF's liaison with

several funding partners, including the European Foundation for the Study of Diabetes and the Roche Organ Transplantation Research Foundation. Currently, Dr. Hwa serves as a representative on the United Network for Organ Sharing Pancreas Transplantation Committee and the Collaborative Islet Transplant Registry Scientific

Steering Committee. Dr. Hwa received his undergraduate degree in chemical engineering from Cornell University and his doctorate in bioengineering from Massachusetts Institute of Technology.
